Attention: Ruth Mancos

Dear Ruth Mancos:

I am writing this letter in response to your request for information regarding the conservation chemical site and our phone conversation of Feb 22, 1990.

As I explained in our conversation we have never had any reason to use P.C.B. in any of our manufacturing processes. We are a manufacturer of printed circuit boards and had sent spent acid waste to the conservation chemical company site.

We were also a contributor to the cost of prior clean up that was performed at the site. However, we do not feel we have a responsibility in the clean up any P.C.B. waste problems.

Yours truly,

A handwritten signature in cursive script, appearing to read "George L. Orbank".

George L. Orbank
Plant Superintendent
